Class Abilities:

Instead of making an attack, the Warlord may grant one ally within 30 feet an extra melee attack. This extra attack is made on the warlord's turn, but uses the ally's attack bonus and damage. The extra attack can only be with a weapon that is already in hand. This ability is usable at will.

Instead of making an attack, the Warlord can grant a +2 bonus to all allies within 30' AC and saving throws for one round.

Instead of making an attack, the Warlord can grant a -2 penalty to all enemies within 30' to AC and saving throws for one round.

A Warlock's spells are drawn from the Cleric list, however he only gets ½ as many spells per day (round up) as a Cleric of the same level, and his list is dramatically shorter than the Cleric's.
